

UVMATIC® Advanced Air Purification System

Completely automated and chemical-free, UVMATIC is the perfect solution to eliminate odour and reduce harmful bacteria on hard surfaces.

A hospital-grade solution which is suitable for all markets, you can trust UVMATIC to destroy bacteria in your environment without the need for specialist training or arduous additional cleaning regimes. In fact, UVMATIC makes it easier than ever to meet the exceptional standards of hygiene which your staff and visitors expect.

UVMATIC uses powerful UV and Ozone technology to cleanse the air of viruses such as influenza, as well as E. coli, salmonella, and similar bacteria. Not only will the power of UVMATIC kill odour and defend health, but its environmentally friendly technology will protect the planet, too.

Advanced Technology

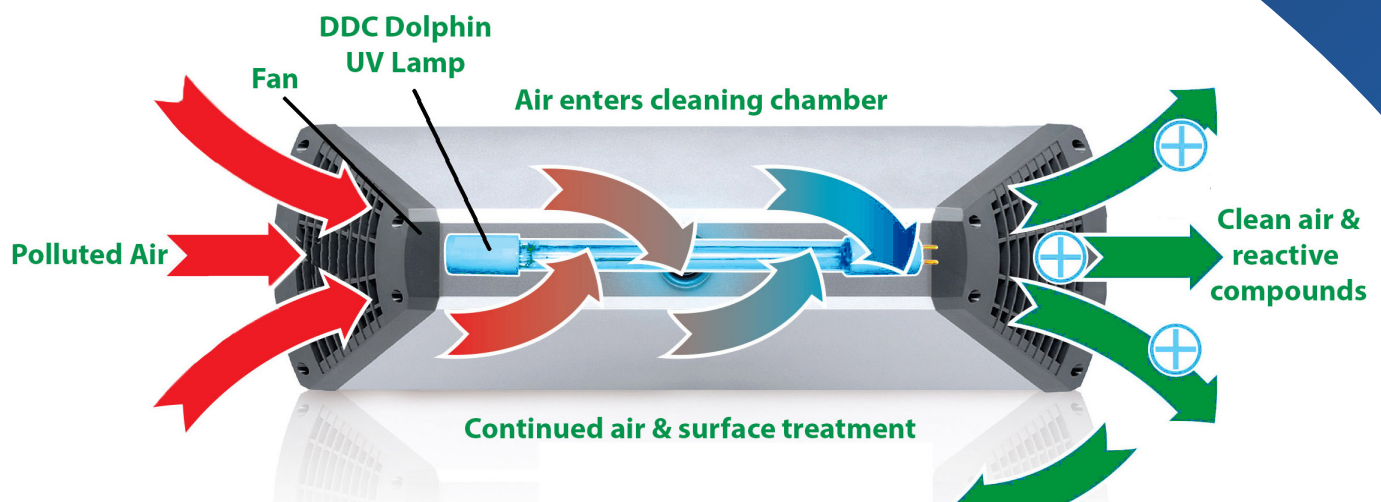

- Combines UV and Ozone technology to combat malodours
- 24/7 operation providing total support to existing cleaning regime
- High quality, low maintenance UV lamp
- Mains installation
- Flexible mounting options

Benefits

- Creates a fresh, clean, and welcoming environment by removing bacteria from the air
- Environmentally friendly, reducing the need for harsh chemical solutions to control bad odours and cleanse surfaces
- Minimal running costs, similar to a low energy light bulb
- Minimal maintenance
- Defends your reputation by supporting exceptional hygiene standards

The Technology

UVMATIC draws in polluted air and treats it using UV light and photo catalytic oxidation.

This results in the production of three powerful, odour fighting ingredients:

Photoplasma - eliminates bacterium, viruses, mould, and micro-organisms

Ozone - a highly reactive and energised oxygen which disinfects the air

Negative ions - increases the efficiency of the process, removing airborne impurities and dust.

This technology is proven to kill odour-causing bacteria, leaving your environment smelling fresh, clean and increasing hygiene standards without any input from your team.

Economic Value

The UVMATIC is powered by one specialist, high-quality and low energy 16-watt UV lamp, which gives you 9,000 hours of worry-free air cleansing.

Not only will the unit operate seamlessly without input from your staff, but it also requires very little maintenance – creating a truly cost-effective and reliable solution to hygiene concerns.

Installation

Not sure where to install your UVMATIC for most efficient operation? We can help.

Our highly qualified representatives will provide clear recommendations of where to fit the unit and ensure best performance for your environment.
